Socialist Green Unity Coalition

Fight now for the future! Bridge the pensions gap by making capitalism pay!

We the undersigned reject the plans of the government to reduce future pension entitlement and increase the retirement age to 67.

We call instead for a big increase in the basic state pension so that it provides a decent level of income for all, without means-testing, and rises annually in line with average earnings. We demand the bosses pay through an progressive increase in tax on high incomes and a collective tax on business, restoring the employers' contribution to pensions which has been allowed to dwindle and decline in the past twenty years.
